

Data and object streams exercises

Exercise 1 – Data Streams:

1. Write a program that stores multiple students' marks (int, double, boolean pass/fail) in a file using `DataOutputStream`.
2. Read and display the data using `DataInputStream`.

Exercise 2 – Object Streams:

1. Create a class `Book` with attributes title, author, and price.
2. Serialize a list of books into a file `books.ser`.
