

Java Enum Exercises

- 1.** Create an enum called Color with RED, GREEN, BLUE. Write a program that prints all colors using a loop.
- 2.** Create a class with an inner enum VehicleType { CAR, BUS, BIKE }. Write a program that prints one value of the enum.
- 3.** Create an enum Day and use it inside a switch statement to print whether the day is a weekday or weekend.
- 4.** Create an enum Planet with fields mass and radius. Add a method that calculates the density of each planet.
- 5.** Create an enum Subject { JAVA(4), PYTHON(3), DB(2) }. Modify one subject's credit hours and print updated values.
- 6.** Create an interface Printable with method print(). Create an enum Shape that implements Printable and prints a different message for each shape.
- 7.** Create an enum Level { LOW, MEDIUM, HIGH }. Use an if-else statement to print warning messages based on the level.
- 8.** Loop through an enum Month and print each month with its month number (JAN=1 ... DEC=12).
- 9.** Create an enum Operation with ADD, SUBTRACT, MULTIPLY, DIVIDE methods. Each constant should perform the operation on two integers.
- 10.** Create an enum OrderStatus { NEW, PROCESSING, SHIPPED, DELIVERED, CANCELLED }. Write a method that prints a message depending on the order status.
